Foreword	xi		
1 Introducing the Digital Photo Workflow 1			
1.1 The Basic Digital Photo Workflow	2		
1.2 Computer Equipment	3		
1.3 What are RAW Files?	5		
1.4 JPEG Instead of RAW?	11		
1.5 Camera Settings	12		
1.5.1 Using Histograms as an Exposure Aid	12		
1.5.2 Clipping in Individual Color Channels	13		
1.5.3 Using White Balance Settings to Produce Optimum Color Quality	14		
1.5.4 Objective and Subjective White Balance	15		
1.5.5 Choosing the Right ISO Sensitivity Setting	15		
1.6 From the Camera to the Computer	16		
1.6.1 Downloading and Organizing Your Images	17		
1.6.2 Renaming Your Files	19		
1.6.3 Backup	20		
1.6.4 Handling Your Digital Originals	21		
1.7 The Digital Light Box	22		
1.8 Adobe Bridge	23		
1.8.1 The Bridge “Review” Mode	25		
1.9 Metadata	28		
1.10 Views	30		
1.11 Buzzwords You Should Know	33		
2 The Basic Workflow 37			
2.1 The Five Phases of the Workflow	38		
2.2 Phase 1: Shooting	38		
2.3 Phase 2: Image Transfer and Management	43		
2.3.1 Transferring Image Files from a Memory Card to a Computer	43		
2.3.2 Saving Your Image Files Safely	44		
2.3.3 Image Inspection	44		
2.4 Phase 3: Image File Conversion and Optimization	46		
2.4.1 Which Steps are Better Performed with a RAW Editor, and Which Using Photoshop?	47		
2.5 Phase 4: Output	49		
2.6 Phase 5: Digital Asset Management	50		
2.7 The Influence of Individual Tools on the Workflow	51		
2.8 Increasing Efficiency	53		
2.9 Develop Your Own Approach to the Workflow	54		
3 Color Management Know-How 57			
3.1 Understanding Different Color Models	58		
3.2 Understanding Color Management	61		
3.2.1 ICC Profiles	62		
3.2.2 What is a Color Management System?	62		
3.2.3 Working Color Spaces	63		
3.2.4 Visualizing Color Spaces	65		
3.3 Mapping Color Spaces	68		
3.3.1 Assigning and Converting Color Profiles	69		
3.4 Creating Device Profiles	70		
3.4.1 Camera Profiles	71		
3.4.2 Printer Profiles	71		
3.4.3 Scanner Profiles	72		
3.5 Profiling Your Monitor	72		
3.5.1 Hardware-Based Calibration	72		
3.6 Photoshop Color Management Settings	76		
3.7 Printer Profiles	79		
3.8 Installing and Uninstalling Profiles	81		
3.9 Soft-Proofing and Gamut Warning	82		
3.10 Color Temperature and Hue	84		
3.11 Complementary Colors	85		
3.12 Working Spaces II	86		

4	Image Processing Basics	89	5	RAW Editing and Conversion	137
4.1	Don't be Afraid of Photoshop	90	5.1	Some Initial Thoughts	138
4.1.1	Simple Image Rotation	90	5.1.1	How Much Editing in the RAW Converter?	139
4.1.2	Image Inspection Using Photoshop	91	5.1.2	Integrating RAW Editors/Converters into the Workflow	139
4.2	8-bit or 16-bit Color Depth?	92	5.1.3	Choosing the Right RAW Converter	141
4.3	Image Size and Resolution	93	5.1.4	RAW Conversion Workflow	142
4.4	Choosing a File Format	96	5.2	Important Aspects of RAW Processing	143
4.5	File Information and Logs	99	5.2.1	Which Processing Steps are Performed Where?	143
4.6	Image Alignment	101	5.2.2	What to Look for When Choosing a RAW Converter	144
4.7	Simple Corrections	103	5.2.3	Other Features of RAW Converters	149
4.7.1	Optimizing Tonal Range	103	5.2.4	Other Useful Features	153
4.7.2	Flexibility through Curves	105	5.3	Adobe Camera Raw (ACR)	156
4.7.3	The Shadows/Highlights Tool	108	5.3.1	Sample of a Real World ACR Adjustments Workflow	159
4.8	The Art of Sharpening	110	5.3.2	Synchronizing Image Adjustments	162
4.8.1	The Three Most Common Types of Sharpening	111	5.3.3	Optimizing Dynamic Range	162
4.8.2	Unsharp Mask	111	5.3.4	Image Optimization Using Tone Curves	164
4.8.3	Unsharp Mask Filter (USM)	112	5.3.5	Selective Tonal Corrections	165
4.8.4	Enhanced Sharpening Using Smart Sharpen	113	5.3.6	Saving and Discarding Changes	166
4.8.5	Additional Sharpening Tools	114	5.3.7	An Overview of the ACR Interface	167
4.9	Color Corrections	115	5.3.8	ACR Image Adjustments Panel	172
4.9.1	Correct White Balance	115	5.3.9	Effects Tab	183
4.9.2	Making Corrections to Color Temperature	117	5.3.10	ACR Presets	185
4.9.3	Software Filters for Warmer or Cooler Colors	118	5.3.11	Batch Conversion	188
4.9.4	Adjustments Using Hue/Saturation	119	5.4	Other RAW Converters	190
4.9.5	Color Adjustments Using Photo Filter	121	5.4.1	Capture One Pro	190
4.10	Selection Tools	122	5.4.2	DxO Optics Pro	192
4.10.1	The Marquee Tools	123	5.4.3	RAW Developer	194
4.10.2	The Lasso Tools	124	5.4.4	Canon Digital Photo Professional (DPP)	195
4.10.3	The Magic Wand	125	5.4.5	Nikon Capture NX (CNX)	196
4.10.4	The Quick Selection Tool	125	5.4.6	Silkipix Developer Studio (SDS)	198
4.10.5	Selection Using a Color Range	125	5.4.7	LightZone	199
4.10.6	Saving and Loading Selections	127	5.5	Even More RAW Converters	201
4.11	Retouching and Repairing Images	127			
4.12	Speed Up Your Workflow with Photoshop Actions	130			
4.13	Photoshop's History Panel	133			
4.14	Additional Information and Overviews	134			

6	All-in-One Workflow Tools	205		
6.1	What We Expect of an All-in-One Tool	206		
6.2	Apple Aperture	208		
6.2.1	The Aperture Workflow	211		
6.2.2	Editing Photos in Aperture	212		
6.2.3	Output	214		
6.2.4	Printing in Aperture	216		
6.2.5	Searching and Filtering	216		
6.3	Adobe Lightroom	218		
6.3.1	The Lightroom Workflow	219		
6.3.2	Correcting Images Using Lightroom	222		
6.3.3	Lightroom Output Modules	230		
6.3.4	Organizing Your Images Using Lightroom	236		
6.4	Bibble 5	238		
7	Photoshop Layers	245		
7.1	Layers Panel	246		
7.2	Your First Layer	249		
7.2.1	Changing Layer Opacity	250		
7.2.2	Blending Modes	250		
7.3	Using Adjustment Layers	251		
7.4	Making Selective Adjustments Using Layer Masks	254		
7.4.1	Understanding Layer Masks	256		
7.4.2	Paths and Vector Masks	261		
7.5	Flattening and Merging Layers	264		
7.6	Smart Cropping	265		
7.7	Removing Moiré Effects	267		
7.8	Auto Color Correction for Better Contrast	268		
7.9	Blending Layers Using Layer Styles	270		
7.10	Dodge and Burn Using Layers	271		
7.11	Loading Image Files into a Stack and Aligning Layers	272		
7.12	Smart Objects and Smart Filters	274		
7.13	Organizing Layers	277		
7.13.1	Layers Panel Options	277		
7.13.2	Naming Layers	277		
7.13.3	Layer Groups	278		
7.13.4	Restricting Layer Effects to a Single Lower Layer	279		
7.13.5	Merging and Flattening Layers	280		
7.14	Other Aspects of Working with Layers	280		
7.15	Getting a “Layer Feeling” without Using Layers	282		
7.16	Selective Adjustment Using U Point Control Points	282		
7.17	More Tips for Working with Layers	286		
8	Advanced Photoshop Techniques	291		
8.1	Correcting Saturation Selectively	292		
8.2	Some Tricks for Improving Saturation and Contrast	294		
8.3	Correcting Perspective Distortion	297		
8.3.1	Simple Perspective Corrections	298		
8.3.2	Fine-Tuning Perspective Corrections	299		
8.4	Correcting Lens Errors	302		
8.4.1	Correcting Distortion	304		
8.4.2	Correcting Lens Errors Using Photoshop	305		
8.5	Correcting Color Casts in Shadows	308		
8.5.1	Using Photoshop Tools	308		
8.5.2	Color Correction Using Color Mechanic Pro	309		
8.6	Using Masks to Increase Luminance	311		
8.7	Correcting Images Using Brush Techniques	315		
8.8	Advanced Sharpening Using Photoshop Layers	317		
8.8.1	Sharpening Using Enlarged Images	318		
8.8.2	Correcting Sharpening Halos	319		
8.8.3	Sharpening Edges	320		
8.8.4	Uwe's DOP Sharpening Frame Action	322		
8.8.5	Sharpening and Defocusing Using the Same Filter	323		
8.9	Adding Digital Sunshine to Your Photos	326		
8.10	Brush Off Noise	328		
8.11	Enhancing Midtone Contrast	331		
8.12	Enhancing Local Contrast	334		
8.13	Content-Aware Fill	340		
8.14	Fine-Tuning After Upsizing or Downsizing Images	341		

9	Multishot Techniques	343	11	Printing and Image Presentation	411
9.1	Common Steps in a Multishot Workflow	344	11.1	Publishing Images and Image Data	412
9.1.1	Shooting the Image Sequence	344	11.2	Printing Images on Paper	412
9.1.2	Image Preprocessing	345	11.2.1	The Journey from Pixel to Printed Dot	413
9.2	Increase Your Angle of View Using Stitching Techniques	349	11.3	Printing on Photo Paper	419
9.2.1	Panorama Shooting Techniques	349	11.4	Printing Using Inkjet Printers	423
9.2.2	Merging Images Using the Photoshop Photomerge Command	351	11.4.1	Choosing a Fine Art Printer	423
9.2.3	Stitching Using Autopano Pro 2	355	11.4.2	Printing Strategies	426
9.3	Maximizing Depth of Field Using Focus Stacking	360	11.4.3	Printer Profiles	427
9.3.1	Shooting for Focus Stacking Applications	360	11.4.4	Paper Types	428
9.3.2	Preparing Your Images for Stacking	361	11.5	The Print Workflow	431
9.3.3	Merging Images Using Helicon Focus	361	11.5.1	Preparing Your Printer	433
9.4	Increasing Dynamic Range Using HDRI Techniques	364	11.6	Printing Your Image	435
9.4.1	HDRI Shooting Techniques	364	11.6.1	Basic Print Settings	435
9.4.2	HDRI Image Preparation	365	11.6.2	Photoshop CS5 Print Dialog	437
9.4.3	Creating HDR Images Using Photoshop CS5	367	11.6.3	Printing Under Windows with the Epson R3880	440
9.4.4	HDR Imaging Using Photomatix Pro	375	11.6.4	Color Printing with the Canon iPF6100 under Mac OS X	443
9.4.5	Photomatix Pro “Exposure Fusion” Function	382	11.6.5	Black-and-White Printing	447
10	Turning Color into Black-and-White	391	11.6.6	Finding a Printer’s Black and White Point	449
10.1	From Color to Black-and-White	392	11.7	Specialty Printing Software and RIPs	451
10.2	Black-and-White Conversion Using the Channel Mixer	393	11.7.1	Print Software	452
10.3	Enhanced Black-and-White Conversion	395	11.7.2	RIPs (Raster Image Processors)	452
10.4	Black-and-White à la Russell Brown	397	11.8	Creating Contact Sheets	453
10.5	Black-and-White Conversion Using the Black & White Command	399	11.9	Printed Frames	455
10.6	Black-and-White Conversion Using Photoshop Plug-ins	402	11.10	Publishing Images on the Web	457
10.7	Black-and-White Conversion Using a RAW Editor	406	11.11	Creating Digital Slideshows	460
10.8	Colorizing Images	408	11.12	Other Ways to Present Your Images	462
			12	Useful Photoshop Plug-ins	465
			12.1	Photoshop Extensions	466
			12.1.1	Filter Plug-ins	468
			12.1.2	Automation Plug-ins	469
			12.1.3	Automation Scripts	469
			12.1.4	Installing Photoshop Plug-ins, Filters, and Scripts	470
			12.2	White Balance and Color Corrections	471

12.3	Reducing Noise Without Losing Detail	475	A	Resources	513
12.4	Third-Party Sharpening Tools	477	A.1	Recommended Books	513
12.5	Correcting Perspective and Other Optical Anomalies	478	A.2	Tools We Use Regularly	514
12.6	Tone Mapping and HDR Images	480	A.3	More Information on the Web	518
12.7	More Useful Tools	483	A.4	Inks and Inkjet Papers	520
13	Data Management and Backup	489		Index	521
13.1	Managing Your Image Library	490			
13.1.1	Image Data Management Requirements	491			
13.1.2	Metadata is the Key to Image Management	492			
13.1.3	Assigning Keywords and Other Attributes	494			
13.1.4	Other Image Management Functionality	496			
13.1.5	Workflow Control	497			
13.1.6	Where Are My Image Files Stored?	497			
13.1.7	Image Management Software	499			
13.2	Data Security	504			
13.2.1	The Risks Involved	504			
13.2.2	Some Practical Tips	506			
13.2.3	Which Data Should I Back Up?	507
