1	Basics	1
1.1	Introduction	1
1.1.1	Using GIMP 2—About this Tutorial	1
1.1.2	Brief—About GIMP 2	2
1.2	Introduction to Digital Image Editing	3
1.2.1	Characteristics of Pixel Images	3
1.2.2	Resolution	4
1.2.3	Colors on the Screen— Color Models, Color Depth, Numerical Color Values	5
1.2.4	Important File Formats for Practical Work	8
1.3	Loading and Managing Digital Photos on the Computer	11
1.3.1	Using the Operating System’s File Management to Import Images from a Camera	12
1.3.2	Using Wizards to Import Images	14
1.3.3	Using the Operating System’s File Management to Organize Photo Collections	14
1.3.4	Helpers: Image Management Programs for Windows and Linux	15
1.3.5	Converting Camera RAW Image Formats under Windows and Linux: Freeware and Plug-ins	16
1.4	Getting the GIMP Running	19
1.4.1	Where Can I Get the GIMP?	19
1.4.2	Installing the GIMP and Plug-ins	19
1.4.3	Starting the GIMP for the First Time	22
1.4.4	Is the GIMP Risky?	23
1.4.5	Many Windows or One Main Window	24
1.4.6	The Main GIMP Interface	25
1.4.7	The Toolbox	27
2	Using the GIMP: Correcting and Touching Up Your Images	31
2.1	Getting Started	31
2.1.1	Opening and Developing a RAW Format, or “Digital Negative” with the GIMP	31
2.2	Editing Images in the GIMP	37
2.2.1	Opening, Setting and Storing an Image—the Steps	37

2.2.2	Opening an Image	38
2.2.3	The Image Window—Your Workspace	39
2.2.4	Rotating an Image by Fixed Values	41
2.2.5	Setting the Image Size and Resolution	42
2.2.6	Changing the Resolution and Size	43
2.2.7	Changing the Image View Size (Zooming)	44
2.2.8	Cropping (Clipping) an Image	45
2.2.9	Saving your Image	46
2.2.10	Printing Images	48
2.3	Working with Scanned Images	50
2.3.1	Prerequisites for Scanning	50
2.3.2	How Scanners Work	51
2.3.3	Problems When Scanning Printed Originals— the Moiré Effect	52
2.3.4	Calculations To Consider Before Scanning	52
2.4	Scanning and Editing an Image	55
2.4.1	The Procedure	55
2.4.2	Scanning Your Image	55
2.4.3	Editing a Scanned Image	57
2.4.4	Determining the Angle and Number of Dots in Your Image	58
2.4.5	Rotating an Image	58
2.4.6	Cropping an Image	60
2.4.7	Using the Gaussian Blur Filter to Remove the Moiré Effect	60
2.4.8	Setting the Contrast and Color—Levels (Tonality Correction)	62
2.4.9	Setting the Contrast and Color Extent— Brightness and Color Levels (Curves)	64
2.4.10	Overview of the Functions in the Image > Colors Menu	68
2.4.11	Saving an Image in Compressed Format (JPG/JPEG) for the Internet	68
2.5	Touchup Work 1—Removing Color Cast	72
2.5.1	What is Touchup Work?	72
2.5.2	Color Correcting Options	72
2.5.3	Using the Levels Tool to Correct Color Cast	72
2.5.4	A Second Method to Remove Color Cast—Color Balance	74
2.6	Touchup Work 2—Removing Spots, Dust, and Scratches	75
2.6.1	Why You Need Smooth Brushes—the Clone Tool	76
2.6.2	Preparatory Work: Creating New Brush Pointers	76
2.6.3	Preparing the Clone—Tool Options	77
2.6.4	Using the Clone for Touchup Work	78
3	Using Masks and Layers—Painting, Filling, and Color Tools	81
3.1	Introduction to Masks and Selections	81
3.1.1	Overview of Selection Tools in the Toolbox	82
3.1.2	Tips For Handling Selection Tools	82

3.1.3	The Select Menu	83
3.1.4	The Edit Menu	85
3.2	Touchup Work 3—Removing Red Eyes	86
3.2.1	Avoiding Red Eyes—Proper Use Of The Flash	86
3.2.2	Exercise Example	86
3.3	Introduction to Working with Layers	87
3.3.1	The Layers Dialog	89
3.3.2	The Context Menu in the Layers Dialog	90
3.3.3	Working with Several Images— Inserting Layers from another Image	92
3.4	Touchup Work 4—Using Perspective Correction to Remove Converging Verticals	92
3.4.1	Trying to Avoid Converging Verticals When Taking Shots	92
3.4.2	Steps Involved and Description of Work	93
3.4.3	Removing Converging Verticals from an Image	93
3.4.4	Transform Tool Options	94
3.4.5	Background Layers and Layers with Alpha Channels	95
3.5	Touchup Work 5—Freshening Up a “Dull Sky”	96
3.5.1	Steps Involved and Description of Work	96
3.5.2	Step 1: Selecting an Area by Color, Deleting it, and Replacing it by a Color Fill	96
3.5.3	Step 2: Creating and Positioning an Image Object on a New Layer	103
3.5.4	Step 3: Creating a Multicolor Sky—the Gradient Tool	104
3.5.5	Step 4: Adding A New Object Or Layer (Sky) To An Image	108
3.6	Typing in the GIMP—Adding Text to an Image	111
3.6.1	Introduction to Fonts	111
3.6.2	Typing in the GIMP—the Text Tool	112
3.6.3	Typing Text and Defining the Text Attributes	113
3.6.4	Creating Text and a Script-Fu Drop Shadow	115
3.7	Using Graphic Filters to Add Effects to Your Images	116
3.8	Creating Your Own Image Frames and Vignettes	117
3.8.1	Single-Color Image Frames	118
3.8.2	Creating a Frame with Pattern	120
3.8.3	Vignettes for Images	121
3.9	Creating and Editing Image Elements—Lighting Effects and Shadow Layers	123
3.9.1	Overview of Part 1—Creating a New Image and New Image Objects	123
3.9.2	Creating a New Image	124
3.9.3	Transforming a Selection	124
3.9.4	Using the Paintbrush Tool to Create Lighting and Shadow Effects—Fuzzy Painting	125
3.9.5	Overview of Part 2—Inserting, Duplicating, and Colorizing Image Objects	126

3.9.6	Changing the Color of an Image Object— the Hue-Saturation Function	127
3.10	Using the Path Tool as a Masking Tool— Using Filters for Light Effects	128
3.10.1	Cutting a Wine Glass and Creating a Drop Shadow— Overview of the Steps Involved	129
3.10.2	Creating and Editing a Path—the Design Editing Mode	129
3.10.3	The Path Editing Mode	130
3.10.4	The Paths Dialog	131
3.10.5	Transforming Paths—the Shear Tool	132
3.10.6	Using Filters to Produce Lighting Effects	134
3.11	Using Layers, Masks, and Paths to Create Three-dimensional Objects—Shadow Layers	135
3.11.1	Creating and Transforming Image Objects	135
3.12	Using Masks and Selections to Dissolve Images	143
3.12.1	Dissolving Two Images with Different Motives	144
3.12.2	Composing a Panoramic Image from Several Images with the Same Motive	146
3.12.3	Programs for Creating Panoramas Automatically	149
3.13	Image Collages—Using Masks and Selections to Cut and Paste Image Objects	149
3.13.1	Copying an Image Object with a Selection and Pasting it in Another Image—the Procedure	149
3.13.2	The Mode Options in the Layers Dialog	151
3.13.3	Using Painting Tools to Paint a Mask with Different Border Attributes	151
4	Working with Black-and-White and Color Images	157
4.1	Converting Color Images Partly or Entirely into Grayscale Images	157
4.1.1	Hints for Working in Grayscale and RGB Modes	157
4.1.2	Removing Color Partly or Entirely	158
4.1.3	Graphic Effects with Gray Levels—an Example	158
4.2	Touching Up Black-and-White Images— Levels, Brightness, Contrast	159
4.3	Cropping Hair—a Tricky Task	160
4.3.1	The Threshold Function	160
4.3.2	Using the Threshold Function to Crop Hair—The Task	161
4.3.3	Using Channels to Crop Hair	164
4.4	Coloring Grayscale Images	169
4.4.1	Using the Colorize Function to Color an Image	170
4.4.2	Using the Levels Function to Color an Image	171
4.4.3	Using the Curves Function to Color an Image with One or More Colors	172

4.4.4 Using the Colorize Filter to Color an Image	173
4.4.5 Using Transparencies and the Colorize Filter to Color Image Areas by Brightness	174
4.5 "Hand-colored" Collages from Black-and-White Photos	175
5 Appendix	179
5.1 How to Proceed from Here	179
5.2 Acknowledgements	179
5.2.1 Further Reading on the GIMP: References	180
5.3 What's on the CD	180
5.4 Native GIMP File Formats	182
Index	185
