

Table of Contents

2 Introduction to the Microscope

- 3 Basic Microscope Parts
- 8 Köhler Illumination
- 13 Troubleshooting

14 The Lens

- 17 Objective Lens
- 19 Viewing the Specimen
- 23 Oil Immersion Objectives
- 25 Depth of Focus
- 26 Objective Lens: Types and Controls
- 26 Water Immersion Lenses Versus Oil Immersion Lenses
- 27 Role of Condenser and Field Diaphragms
- 31 Focusing: Coarse and Fine
- 33 Stage
- 35 Substage
- 35 Head of the Microscope

36 Selecting Microscope Accessories

- 37 Overview
- 37 Stereomicroscopes
- 41 Objectives' Limit of Resolution
- 42 1000x NA Rule
- 42 Magnification Changer and Eyepiece
- 44 Adding to Standard Objective Lenses
- 46 Working with Live Samples in Water
- 47 Condenser
- 47 Stage

48 Digital Concepts

- 49 The Pixel
- 50 Light Intensity and Bit Level
- 52 Color Images and Additive Color
- 53 Introduction to Cameras
- 55 Consumer-Grade (Point-and-Shoot) Cameras
- 56 Digital SLRs
- 56 Dedicated Cameras

4

58 Digital SLRs

- 59 Introduction
- 61 Indirect Mount
- 61 Direct Mount
- 63 Simple Tube Adapters
- 64 Disadvantages of Simple Tube Adapters
- 65 Advanced Adapters
- 67 Avoiding Vibration on Digital SLRs
- 68 Achieving Accurate Focus and Framing
- 69 Olympus E3
- 70 Nikon D700
- 72 Nikon D300
- 74 Panasonic G1
- 76 Panasonic GH1

5

78 Advantages of a Dedicated Digital Camera

- 79 Definition
- 79 Superior Imaging by Dedicated Cameras
- 82 Greater Control through Binning and Gain
- 84 Sensor Array and Magnification
- 85 Pixel (Photosite) Size and Resolution
- 87 Mounting Systems

6

7

88 Using the Cameras

- 89 Illuminating the Specimen
- 89 Color Balancing the Specimen
- 93 Color and Monochrome
- 99 White Balance and Fluorescence Slides
- 99 Optimum Digital Exposure
- 99 Setting the Exposure
- 100 Automatic Exposure
- 101 Manual Exposure

8

104 Improving the Image

- 105 Introduction
- 105 Coverglass Thickness and Contrast
- 110 Stained Samples
- 112 Unstained Samples
- 112 Special Illumination Techniques
- 116 Fluorescence Microscopy
- 118 Difficulties of Photographing Fluorescent Specimens
- 119 Color Imaging in Fluorescence
- 119 Contrast by Phase Differences
- 126 The Phase Contrast Image
- 128 Photographing Phase and DIC Specimens

9

130 Improving the Image with Software

- 131 Introduction
- 131 File Formats
- 132 Improving the Image
- 135 Enhancing Contrast in the Micrograph
- 140 Color and Fluorescence Microscopy
- 146 Extending the Depth of Field
- 149 Extending the Dynamic Range of the Camera

154 Buying a Microscope

- 156 Used Microscopes
- 157 What to Look for in a Microscope
- 159 Stage
- 160 Substage and Illuminator
- 160 Older Microscopes Suitable for Digital Photomicrography

166 Glossary
