

Table of Contents

1	Introduction and Overview	1
1.1	Introducing the Subject Matter	1
1.2	Automotive SPICE and Other Maturity Models: History, Background, and Trends	2
1.3	Automotive SPICE: Structure and Components	6
1.3.1	The Process Dimension	7
1.3.2	The Capability Dimension	8
2	Interpretations Regarding the Process Dimension	11
2.1	ACQ.4 Supplier Monitoring	16
2.1.1	Purpose	16
2.1.2	Characteristics Particular to the Automotive Industry	16
2.1.3	Base Practices	17
	Experience Report	20
	Experience Report	21
2.1.4	Designated Work Products	22
2.1.5	Characteristics of Level 2	23
2.2	SPL.2 Product Release	23
2.2.1	Purpose	23
2.2.2	Characteristics Particular to the Automotive Industry	24
2.2.3	Base Practices	25
2.2.4	Designated Work Products	29
2.2.5	Characteristics of Level 2	30

2.3	ENG.1 Requirements Elicitation	30
2.3.1	Purpose	30
2.3.2	Characteristics Particular to the Automotive Industry	32
2.3.3	Base Practices	32
2.3.4	Designated Work Products	37
2.3.5	Characteristics of Level 2	38
2.4	ENG.2 System Requirements Analysis	38
2.4.1	Purpose	38
2.4.2	Characteristics Particular to the Automotive Industry	38
	Excursus: System	39
2.4.3	Base Practices	40
2.4.4	Designated Work Products	45
2.4.5	Characteristics of Level 2	46
2.5	ENG.3 System Architectural Design	46
2.5.1	Purpose	46
2.5.2	Characteristics Particular to the Automotive Industry	47
2.5.3	Base Practices	48
2.5.4	Designated Work Products	51
2.5.5	Characteristics of Level 2	51
2.6	ENG.4 Software Requirements Analysis	52
2.6.1	Purpose	52
2.6.2	Characteristics Particular to the Automotive Industry	52
2.6.3	Base Practices	53
	Excursus: Example Method Hazard and Operability Study (HAZOP)	54
2.6.4	Designated Work Products	57
2.6.5	Characteristics of Level 2	57
2.7	ENG.5 Software Design	57
2.7.1	Purpose	57
2.7.2	Characteristics Particular to the Automotive Industry	58
2.7.3	Base Practices	58
2.7.4	Designated Work Products	63
2.7.5	Characteristics of Level 2	65

2.8	ENG.6 Software Construction	65
2.8.1	Purpose	65
2.8.2	Characteristics Particular to the Automotive Industry	65
2.8.3	Base Practices	66
2.8.4	Designated Work Products	73
2.8.5	Characteristics of Level 2	73
	Excursus: Test Documentation According to IEEE-Standard 829-1998 (Software Test Documentation)	74
2.9	ENG.7 Software Integration Test	75
2.9.1	Purpose	75
2.9.2	Characteristics Particular to the Automotive Industry	75
2.9.3	Base Practices	76
2.9.4	Designated Work Products	84
2.9.5	Characteristics of Level 2	85
2.10	ENG.8 Software Test	85
2.10.1	Purpose	85
2.10.2	Characteristics Particular to the Automotive Industry	86
2.10.3	Base Practices	87
	Excursus: A Brief Overview of Test Methods	89
	Excursus: Some Methods for the Derivation of Test Cases	89
2.10.4	Designated Work Products	90
2.10.5	Characteristics of Level 2	90
2.11	ENG.9 System Integration Test	91
2.11.1	Purpose	91
2.11.2	Characteristics Particular to the Automotive Industry	91
2.11.3	Base Practices	92
2.11.4	Designated Work Products	95
2.11.5	Characteristics of Level 2	95
2.12	ENG.10 System Testing	96
2.12.1	Purpose	96
2.12.2	Characteristics Particular to the Automotive Industry	96
2.12.3	Base Practices	97
2.12.4	Designated Work Products	99
2.12.5	Characteristics of Level 2	99

2.13	SUP.1 Quality Assurance	99
2.13.1	Purpose	99
2.13.2	Characteristics Particular to the Automotive Industry	100
2.13.3	Base Practices	101
2.13.4	Designated Work Products	110
2.13.5	Characteristics of Level 2	112
2.14	SUP.2 Verification	113
2.14.1	Purpose	113
2.14.2	Characteristics Particular to the Automotive Industry	114
2.14.3	Base Practices	114
2.14.4	Designated Work Products	118
2.14.5	Characteristics of Level 2	119
2.15	SUP.4 Joint Review	119
2.15.1	Purpose	119
2.15.2	Characteristics Particular to the Automotive Industry	121
2.15.3	Base Practices	121
2.15.4	Designated Work Products	125
2.15.5	Characteristics of Level 2	126
2.16	SUP.8 Configuration Management	127
2.16.1	Purpose	127
2.16.2	Characteristics Particular to the Automotive Industry	127
2.16.3	Base Practices	128
2.16.4	Designated Work Products	135
2.16.5	Characteristics of Level 2	137
2.17	SUP.9 Problem Resolution Management	137
2.17.1	Purpose	137
2.17.2	Characteristics Particular to the Automotive Industry	138
2.17.3	Base Practices	138
2.17.4	Designated Work Products	147
2.17.5	Characteristics of Level 2	148
2.18	SUP.10 Change Request Management	149
2.18.1	Purpose	149
2.18.2	Characteristics Particular to the Automotive Industry	150
2.18.3	Base Practices	151
2.18.4	Designated Work Products	155
2.18.5	Characteristics of Level 2	156

2.19	MAN.3 Project Management	156
2.19.1	Purpose	156
2.19.2	Characteristics Particular to the Automotive Industry	157
2.19.3	Base Practices	157
2.19.4	Designated Work Products	169
2.19.5	Characteristics of Level 2	172
2.20	MAN.5 Risk Management	173
2.20.1	Purpose	173
2.20.2	Characteristics Particular to the Automotive Industry	174
2.20.3	Base Practices	174
2.20.4	Designated Work Products	180
2.20.5	Characteristics of Level 2	181
2.21	MAN.6 Measurement	182
2.21.1	Purpose	182
	Excursus: Goal/Question/Metric (GQM)Method	183
2.21.2	Characteristics Particular to the Automotive Industry	184
2.21.3	Base Practices	184
2.21.4	Designated Work Products	190
2.21.5	Characteristics of Level 2	193
2.22	PIM.3 Process Improvement	193
2.22.1	Purpose	193
2.22.2	Characteristics Particular to the Automotive Industry	194
2.22.3	Base Practices	194
2.22.4	Designated Work Products	199
2.22.5	Characteristics of Level 1-3	199
2.23	REU.2 Reuse Program Management	200
2.23.1	Purpose	200
2.23.2	Characteristics Particular to the Automotive Industry	200
2.23.3	Base Practices	201
2.23.4	Designated Work Products	204
2.23.5	Characteristics of Levels 1-3	205
2.24	Traceability in Automotive SPICE	205
2.24.1	Introduction	205
2.24.2	Key-Notes	205
	Excursus: Verification Criteria	208

3	Interpreting the Capability Dimension	213
3.1	The Structure of the Capability Dimension	213
3.1.1	Capability Levels and Process Attributes	213
3.1.2	Process Capability Indicators	214
3.2	How Are Capability Levels Measured?	214
3.3	The Capability Levels	216
3.3.1	Level 0 («Incomplete Process»)	216
3.3.2	Level 1 («Performed Process»)	217
3.3.3	Level 2 («Managed Process»)	219
3.3.4	Level 3 («Established Process»)	234
3.3.5	Level 4 («Predictable Process»)	249
3.3.6	Level 5 («Optimizing Process»)	250
4	CMMI – Differences and Similarities	253
4.1	Introduction	253
4.2	Comparison of Structures	255
4.3	Comparison of Contents	257
4.4	Comparison of the Assessment/Appraisal Methods	260
5	Functional Safety	263
A	Overview of Selected Work Products	267
