Chapter 3 – The Webcam

Applications of a Webcam

- Characteristics of a Webcam
- Suitable Photo Motifs for a Webcam
- Advantages and Disadvantages of a Webcam

35

36

36

36

37

Buying Tips for Webcams and Accessories	40
Tips for Purchasing a Webcam	40
Useful Accessories for Your Webcam	41
Taking Astrophotos with a Webcam	43
Before the First Exposure	43
The First Exposures with Your Webcam	47
Processing Your Webcam Images	53
The Processing Steps	53
Image Processing in Registax	54
Fine-Tuning in Photoshop	58

Chapter 4 – The Digital Single Lens Reflex Camera **61**

Application Areas of a Digital Single Lens Reflex Camera	62
Characteristics of a DSLR	62
Suitable Photo Motifs	63
Advantages and Disadvantages of a DSLR	64
Buying Tips for DSLR Cameras and Accessories	70
Tips for the Camera Purchase	70
Useful Accessories	71
Budget	73
Taking Astrophotos with a DSLR	74
Piggyback on the Telescope	74
Photography Through the Telescope	76
Processing Your DSLR Images	83
Photos of the Sun and Moon	83
Photos of Deep-Sky Objects	87

Chapter 5 – The Astronomical CCD Camera **93**

Application Areas of an Astronomical CCD Camera	94
Characteristics of a CCD Camera	94
Suitable Photo Motifs	95
Advantages and Disadvantages of a CCD Camera	97

Buying Tips for CCD Cameras and Accessories	105
Tips for the Purchase of the Camera	105
Suggested Accessories	105
Budget	108
Taking Astrophotos with a CCD Camera	109
Photography with a Camera Lens	109
Photography Through the Telescope	110
Processing your Astronomical CCD Camera Images	121
The Data Pool	121
Image Processing with Astroart	122
Conclusion	135
Clear Skies!	136
Astrophotography is Fun	136
Presentation and Data Backup	137
Appendix	139
Digital Cameras for Astrophotography	139
Application Areas of Digital Cameras in Astrophotography	139
The Correct Angle of View	140
Resources: Web Links, Addresses; Further Reading	141
Glossary	147
Imaging Data of the Astrophotos	153
